If you have any questions regarding equipment feel free to contact us at: contact@pgigreenland.com

NIGHT SKY PHOTOGRAPHY

2018 Winter activities,
2019 coming soon

Winter nights dress the landscape of Ilulissat, sometimes dotted-with-stars black, sometimes full-moon white and sometimes Northern-Lights green. No matter the color, we will show you how to best capture the incredible beauty and colours of the winter Arctic sky, using your camera.

The activity starts from our office, where we will be warm and comfortable. Our professional photographer will explain to you how to use your camera settings, to capture stars and northern lights over a cup of coffee, tea and biscuits.

Then we go outside, and use snowshoes and ski poles. We walk to the best spot to put in use these techniques. We will take you to the Ilulissat Icefjord, the UNESCO World Heritage Site. From there, no sound or light pollution, so you can fully experience the winter nights. Our snowshoeing guide will show you how to use of the equipment and guide the route.

No previous experience is required, but a minimum level of fitness is advisable. Anyone can learn how to move in winter terrain with snowshoes and ski poles.
